

L'Office de consultation
publique de Montreal

My memoires are based on a 3 point format / concerns.

a) The long term damages and effects of pollution to the population of Montreal, the environmental consequences that future generations will suffer the burdens of un-cleanable and in-reparable mistakes of their forefathers. I don't think anybody wants to claim that disrespectful responsibility.

b) Griffintown and our immediate neighborhood has been " under siege " for more than two decades by not allowing licenses and permits to development by the present property owners. These intellectual restrictions imposed by past administrations on it's citizens by unjust reserves and freezes on properties. Limitations on different organizations who will not build or improve in the area ie. Bell telephone, Internet companies ,and Videotron in the block of Peel, Wellington ,Shannon and Ottawa streets . This is nothing less that a new form of terrorism unless they have a new label to replace it.

c) Let the democratic process work , I request that a public referendum must be exercised , so that the people have their input on constructive development.

I thank you in advance to take charge and do the right thing.

On behalf of my spouse, my daughter and my son, all residents , proprietors an businessmen in Griffintown.

Sincerely '

Zaven Darakjian
