Les familles ont aussi besoin de la voitures pour circuler. Meilleure gestion piétons et voitures, les travaux rendent les déplacements très difficiles

Hopefully the REM station is placed further down the line, not halfway between Bonaventure Station and Bonaventure Pre-School like in the plans. Seems like a wasted spot for it. Also, I may be in the minorit but I'd be in favour of a baseball stadium if it comes up. Thank you for looking out for us!

Une école et une bibliothèque sont les plus importants ajouts à faire selon nous.

There was a park that was supposed to be done long ago and it's still not near completion. The one corners Ottawa-Ann-William. This is very disappointing and frankly unacceptable.

Less traffic and more green spaces for families, dog parks, water parks.

A market (ie smaller version of Jean Talon market) would be amazing!!!

Besoin d'une école primaire

Une école est un besoin prioritaire.

Permettre aux infrastructures en place comme les garderies de pouvoir accueillir les enfants après 5 ans dans le cadre d'une école privée.

It would also be nice to be able to find parking near all these amenities.

I think it's really important to have mixed development (e.g. the 15 minute city model). A vibrant, attractive neighbourhood should have almost everything a family needs within a reasonable walking distance (groceries, restaurants, a variety of shops, schools, medical services, parks, etc.). This model is both more sustainable (less reliance on cars) and more attractive for residents.
