

Stop gentrifying our landmarks!

Honestly I can't believe the city is considering just using this space for commercial purposes exclusively, know that it is a central landmark feature of a neighbourhood and that not utilizing it with the community's explicit consultations considered (which was CLEAR from the last sessions, ensuring that affordable housing/artist spaces and community space were a true priority) is such a betrayal of the due process which you claim to uphold. Please PLEASE stop trying to ignore the community's input here and stop creating the environment which is destroying all the features of our favorite city. Stop putting profit over the people.
