

I have two questions as follows:

1...With the creation of the Urban Boulevard, has thought been given to creating a north-south bicycle path along the Urban Boulevard which would provide access from Boulevard Gouin to Lakeshore Road? This is much needed as it is very dangerous biking on blvd. St. Charles and blvd. St. Jean.

2. I live in Heritage sur le Lac and initially the gardens and landscaping around the park and lake were beautiful. With time, however, weeds grew in amongst the flowers and very little maintenance was done. Eventually all of the rose bushes were pulled out and the garden in another area was totally redone. Not only is this a total waste of money but an eyesore to the residents. Will more thought be given to the initial landscaping of Cap Nature to ensure that money is not wasted and that resources are made available to provide adequate maintenance? If they can't look after Heritage sur le Lac, what makes me believe they will do a better job with this new project?
